FILM & HDTV JIB CAPABILITIES

For over 25 years I have been operating Jib Arms in one form or another and the Jimmy Jib for over 15 years in film, HDTV and video mode on thousands of shoots, including sit-coms, episodic, commercials, industrials, infomercials and music videos. I am capable of operating with a minimum of rehearsal and can replicate shots over and over for multiple takes. I have the experience and creative skills to develop sophisticated shots that express the scene appropriately and, when asked, can guide Directors and Directors of Photography in the effective and proper use of the Jib. Only my jibs have been extensively modified for film and HDTV applications, including witness camera systems, built in zoom systems, 12 and 24 volt power supplies, video DAs, battery support so no additional rentals are required, beyond the camera.
